Re: WT Docket No. 01-309
HAC Digital Wireless Telephones

Second Semi-Annual Report

Dear Ms. Dortch:

On behalf of Centennial Communications Corp. ("Centennial"), I am submitting this second semi-annual progress report on hearing aid compatibility with Centennial's digital wireless systems. Centennial holds 33 cellular licenses in six states, as well as the B Block broadband PCS licenses in MTA 25 – Puerto Rico/US Virgin Islands. In Centennial's domestic markets, it utilizes Motorola, Nokia, Sony Ericsson, and Panasonic equipment, in the Caribbean market, Centennial uses Audiovox equipment. As a result, Centennial depends on the implementation of hearing aid compatibility solutions by these manufactures. Once the hearing aid compatibility solutions of these equipment manufacturers are commercially available, Centennial will implement them in its markets.

Centennial understands that these equipment manufacturers will be filing hearing aid capability status reports through the Alliance for Telecommunications Industry Solutions ("ATIS"), and it directs the Commission to those reports for specific information regarding development and deployment activities. Centennial will make every effort to implement hearing aid compatibility equipment in its markets as soon as possible.

Please contact me is you require any additional information.

Very truly yours,

WILLIAM L. ROUGHTON
Vice President
